Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-7, 15-19, 64 and 65, drawn to hashing a body of text, classified in class 711, subclass 216.
 - II. Claims 8-14, 20-62, 63 and 66, drawn to manipulation (recognition and detection) of a body of text, classified in class 382, subclass 181.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as address formation in electrical computers and digital processing systems by hash processing wherein an address value (i.e., key other than an encryption key) is manipulated to form an index value. Invention II has separate utility such as text recognition.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

2. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mehrdad Dastouri whose telephone number is (703)
